

Progeasy 3 Technical Bulletin

Product Name Before Change: Progeasy 1 Chip Reset Device

Product Name After Change: Progeasy 3 Chip Reset Device

Change Description:

Production of the Progeasy 1 Chip Reset Device has been discontinued. It's successor, the new generation of chip reset device Progeasy 3, is now in full scale production.

Reason for Change:

The Progeasy 3 model is a next-generation chip reset device that improves upon the Progeasy 1 model. It offers upgraded hardware specifications, software systems, and supporting services. It is designed for a broader range of applications and provides a more refined user experience.

Parameter Type	Progeasy 3	Progeasy 1
Standard Functions	Chip Operations: Identification, Reset, Reprogram	Chip Operations: Identification, Reset, Reprogram
New Features	Recharge, Personal Center	N/A
Hardware Specifications	Screen Size: 11.5-inch	Screen Size: 4.3-inch
	High Refresh Rate Touchscreen: 2K 120Hz, Higher Definition	Capacitive Touchscreen: 800x480 Resolution
	Connection: Wireless (Bluetooth, up to 50m range) between Tablet and Identification Head	Connection: Wired between Tablet and Identification Head
	Identification Head: 2.4-inch color display	Identification Head: No display

Feature Comparison	Smooth Touchscreen Display	Non-touchscreen
	Full keyboard input for quick model search; powered by an 8-core CPU (2.8 GHz)	Supports only page-by-page browsing; powered by a microcontroller (MCU)
	Supports Advanced Filtering and Model Favorites	Not Supported
	Replaceable Pinboard	Not Supported
	Multi-Language	Not Supported
	Online and Offline Top-Up	Offline Top-Up Only
	Supports Connecting Multiple Identification Heads Simultaneously	Not Supported
